

## Does your existing ERP:

- Deliver relevant contextual insights in real time?
- Let you address organizational changes and reporting without disruption?

## Do you need:

- Increased efficiency of audits and controls?
- Multinational processes that can be handled in a single system?
- The ability to close faster with a more efficient process?
- Better planning and forecasting?
- Innovative cloud foundations that seamlessly deliver the latest technologies while ensuring the highest levels of security and compliance?

**One of the efficiencies that we've created now is that we can do the manpower report, and we are getting reports out that — boom — have your financial numbers and — boom — have your people numbers.**

Susan Schoolfield, Chief Accounting Officer, Apex Capital

Can you

be confident that your reports are correct and data is consistent?

support enterprise goals with your back-office system?

make real-time decisions quickly and efficiently?

do more with less?

## Workday Financials can:

Streamline your chart of accounts

Modernize and transform  
your finance, planning and  
accounting operations

Optimize finance operation costs

Allow quicker period-end closings

Provide financial reporting,  
forecasting and planning in one  
system for a single source of truth

Give you real-time financial and  
management reporting and KPIs

Driving  
change,  
improving  
outcomes

## Mercer provides:
