

## Fund Information

Fund Assets	\$1,173.09 Million
Turnover	30.00 %
Average Market Cap	\$93,303.06 Million
Price/Earnings	14.79
Price/Book	2.62
# Equity Holdings	194

## Investment Objective & Strategy

The investment objective of the Fund is to provide long-term total return, which includes capital appreciation and income.

The fund invests principally in equity securities (such as common stock) issued by large capitalization U.S. companies. It employs a "core equity" investment strategy that seeks to meet the fund's investment objective by investing in both growth and value-oriented equity securities. Under normal circumstances, the fund will invest at least 80% of its net assets (plus borrowings for investment purposes, if any) in the equity securities of large capitalization U.S. companies. The Advisor is responsible for constructing and monitoring the asset allocation and portfolio strategies for the Funds, consistent with each Fund's investment objective, strategies, and risks.

## Risk Measures

The performance data quoted reflects past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than return data shown herein. Performance shown is net of fees and assumes the reinvestment of dividend and capital gain distributions. No information is shown for Adviser Class, Class I or Class Y-2 shares because these share classes had not been offered as of the date of this fact sheet. The returns of these share classes would have been substantially similar to the returns of Class Y-3 shares; however, because the Adviser Class, Class I and Class Y-2 shares are subject to a 12b-1 fee and/or a non-distribution shareholder administrative services fee, the returns of these share classes would have been lower than those shown for Class Y-3 shares. For more information including performance current to the most recent month-end, please call 1-800-346-2510.

Mercer Investments LLC (the "Advisor") has contractually agreed, until at least July 31, 2023, to waive any portion of its management fee that exceeds the aggregate amount of the subadvisory fees that the Advisor is required to pay to the Fund's subadvisors.

The Gross Expense Ratio is taken from the most recent Fund Prospectus and represents the total operating expense excluding the impact of these waivers while the Net Expense Ratio includes the impact of these waivers.

A 2.00% redemption fee applies to shares owned less than 30 days.

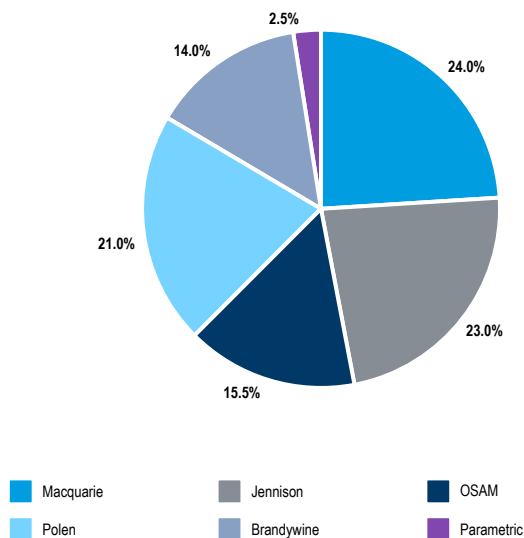

Class Y-2 and Class Y-3 shares generally are available only to "Institutional Investors" which include, but are not limited to "Institutional Accounts" as defined under the rules of the Financial Industry Regulatory Authority, Inc. ("FINRA").

**Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus that contains this and other information, please visit Mercer's website at <https://www.mercer.us/what-we-do/wealth-and-investments/delegated-solutions-us.html> or call 1-800-346-2510. Please carefully read the prospectus, and if available, summary prospectus, before investing.**

## Allocation of Fund Assets

The Advisor, on behalf of the Fund, has entered into subadvisory agreements with subadvisors to manage allocated portions of the assets of the Fund. Under the subadvisory agreements, each subadvisor is responsible for the day-to-day portfolio management of a distinct portion of the Fund's portfolio, subject to the Advisor's oversight. The Fund's subadvisors are:

**Manager Allocation  
As of December 31, 2022**

Manager	Role	Factor Presence	Summary
Macquarie Investment Management Business Trust	Quality Value	Value Low Volatility Quality	Quality value manager who seeks to invest in strong, high quality businesses with sound balance sheets and free cash flow generation.
Jennison Associates LLC	Growth	Momentum	Growth manager who aims to select stocks with long-term differentiators, with the potential to grow earnings faster or longer than the broad market.
O'Shaughnessy Asset Management, LLC (OSAM)	Shareholder Yield	Value Small Size Momentum Quality	Yield focused quantitative value manager that seeks stocks that rank high based on valuation, quality and shareholder yield.
Polen Capital Management, LLC	Quality Growth	Momentum Low Volatility Quality	Concentrated quality growth manager, focused on seeking high quality companies, with sustainable, above-average earnings growth.
Brandywine Global Investment Mgmt, LLC	Deep Value	Value	Deep value manager, who pursues stocks that trade at a significant discount to intrinsic value, with strong free cash flows and quality balance sheets.
Parametric Portfolio Associates LLC	Cash Overlay		Cash equitization strategy.

Allocations are as of the date listed and are subject to change. The managers identified do not represent all of the managers selected or recommended for all clients. It should not be assumed that allocation to the managers identified was or will be profitable.

The material in this fact sheet is based on information from a variety of sources we consider reliable, but we do not represent that the information is accurate or complete. Errors and omissions can occur. You may have a gain or a loss when you sell your shares of the Fund.

## Risk Factors

The Fund employs a "core equity" investment strategy by investing in both growth stocks and value stocks. Growth stocks may be particularly sensitive to market conditions. Investing in value stocks involves the risk that an investment made in undervalued securities may not appreciate in value as anticipated or remain undervalued for long periods of time. The Fund may invest in derivative instruments such as exchange-listed equity futures contracts, swaps and currency forwards which may cause the Fund to experience greater volatility and less liquidity. Derivatives may be more sensitive to changes in market conditions and may amplify the risk of loss for the Fund. The Fund may experience high portfolio turnover which could result in higher transaction costs and capital gains. There are no guarantees that dividend-paying stocks will continue to pay dividends. There can be no assurance that any fund will achieve its objective..

## Key Terms

The **Russell 1000 Index®** is a market capitalization-weighted benchmark index made up of the 1000 highest-ranking US stocks in the Russell 3000. One cannot invest directly in an index.

**Alpha** - Reflects how a Fund did relative to what would be expected given the Fund's beta and the performance of its benchmark. For example, alpha of 1.4 means the Fund outperformed its estimated return by 1.4%.

**Beta** - The Fund's sensitivity to market changes using its benchmark as an approximation of the market, beta greater than 1 is more volatile, beta less than 1 is less volatile.

**Standard deviation** - Typically referred to as Volatility or Risk, standard deviation measures the dispersion of actual returns around their average.

**Sharpe ratio** - Reflects the reward per each unit of risk taken by a portfolio. The higher the ratio, the better the Fund's risk-adjusted return.

**R-squared** - Statistic that indicates how much of a Fund's fluctuations were attributable to movements in the Fund's benchmark.

**Up Market Capture** - Ratio of average portfolio return over the benchmark during periods of positive benchmark return. Higher values indicate better product performance.

**Down Market Capture** - Ratio of average portfolio return over the benchmark during periods of negative benchmark return. Lower values indicate better product performance.

**Turnover** - Depending on market and other conditions, the Fund may experience high portfolio turnover, which may result in higher brokerage commissions and transaction costs and capital gains (which could increase taxes and, consequently, reduce returns).

**Price/Earnings** - A financial ratio calculated as current share price divided by current earnings per share. Earnings per share is the portion of a company's profit allocated to each outstanding share.

**Price/Book** - A financial ratio calculated as current share price divided by book value per share. It compares how the market values a company to the value on the company's books.

**Market Capitalization** - The product of the market price and the total amount of a security outstanding. This represents the total market value of the security in the hands of its investors.

**Average Market Cap** - The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. This is calculated by taking the geometric mean of the market capitalizations of the stocks a fund owns.
